

using Form DT-1302 with those from a control listing form that did not contain the experimental questions, Form DT-1302A, to see if the experimental questions improved our coverage of addresses. For quality assurance purposes, a sample of each block will be advance listed (by observation) in the Quality Assurance Advance Listing Book, DT-1314. This quality assurance listing will not impose any respondent burden.

The listings will be matched to the census list of addresses; the unmatched cases will be sent to the field for reconciliation using the Housing Unit Follow-up Form, DT-1377. For quality assurance purposes, a sample of the follow-up cases will be verified to ensure that the follow-up enumerators visit the block clusters, resolve the cases, and correctly followed procedures. The resultant address listing will be used in the next phase of the ICM, the ICM Person Interview.

As part of our evaluation requirements, we will perform an independent rematch and reconciliation of a sample of the housing unit addresses. The quality assurance and evaluation operations will be conducted using the same form, DT-1377.

II. Method of Collection

Person to person interview.
